About Me

I'm Scar. Founder. Builder. Data Scientist and a creative systems thinker, from Nairobi designing systems that earn trust and that solve real real-world problems.

Skills

- Data Science – Python, SQL, Power BI, Tableau
- AI/ML Engineering – XGBoost, Scikit-learn,
- UX & Copywriting – Figma, brand messaging
- Cybersecurity Awareness – Threat detection, compliance (GDPR, HIPAA)
- Workflow Optimization – Logistics, automation, supplier vetting
- Soft Skills Certified – Precision listening, pattern recognition, systems thinking, and emotionally intelligent communication—honed through lived neurodivergence and high-pressure collaboration.

Education

Bachelor's in Computer Science & Applied Mathematics

Strathmore university

Studies paused (2023) to prioritize long-term performance and professional growth; actively applying core skills in real-world projects.

Bachelor's in Business Analytics

Nexford university

on-going

Focused on data-driven decision-making, predictive modeling, and business intelligence systems.

Experience

Junior Talent Researcher – Olive AI

2020

Supported candidate sourcing and screening for early-stage roles. Helped maintain tracking systems and assisted with outreach during team expansion.

UX Consultant then Data scientist

2021

Collaborated with Fast (2021) on checkout flow diagnostics prior to their Series A; contributed to UX audits and performance insights before the company sunset.

Founder & systems architect

2024

Built ScarGo from zero to signal—designing logistics systems that move fast, feel intuitive, and earn trust. Vetted hardware in Nairobi's toughest markets, architected brand UX, and delivered emotionally resonant messaging that sticks.

Proof of Work

Built, Tested, Delivered.

ScarGo Express was designed to solve real problems, not impress. If it didn't work, it wouldn't be here.
